

1. What are your personal qualities?

I am a responsible and adaptable person who enjoys solving problems. I have strong emotional intelligence, which helps me work well in a team and communicate clearly. I'm also very organized and manage my time effectively.

2. Tell me about yourself.

My name is Chansa Janpimpa. I'm currently studying Computer Engineering at Suranaree University of Technology with a GPA of 3.52. I'm passionate about software development and have built full-stack web applications for real-world projects like an internship management system and a blockchain-based insurance claim system. I'm enthusiastic, always eager to learn, and enjoy turning ideas into working solutions.

3. Talk to me about the subjects you have studied at university. What are they all about?

I've studied core subjects such as Data Structures, Software Engineering, Operating Systems, and Database Systems. These subjects taught me how to write efficient code, build full-stack applications, and design secure, scalable systems. I've also worked with AI and IoT technologies as part of hands-on projects.

4. What are your strengths and skills?

My strengths are my problem-solving ability, teamwork, and communication. I have both technical and soft skills. Technically, I'm skilled in Python, Go, React, and REST API development. Soft skills include critical thinking, time management, and adaptability.

5. What, if any, are your weaknesses?

Sometimes, I tend to focus too much on small details to make everything perfect. I've learned to manage this by prioritizing tasks and keeping deadlines in mind.

6. Why should the company give you the job?

I believe I'm a good match because I have hands-on experience with technologies your company uses, and I am eager to contribute and grow. I'm passionate, reliable, and ready to face challenges with a positive attitude.

7. Are you willing to travel on company business? Why or why not?

Yes, I am. I think traveling for work is a great opportunity to learn, expand my experience, and adapt to different working environments.

8. Do you want to continue studying after you get your degree?

If you mean studying for a master's degree right away, probably not. But I'm definitely interested in short courses that help improve my skills, especially in my field and in languages. I believe in continuous learning and want to keep developing myself professionally.

9. What salary are you expecting from the company?

As a fresh graduate, I am open and flexible. I value the opportunity to grow, learn, and contribute more than the starting salary. I believe the company will offer a fair rate based on my skills and potential.

10. Do you have any questions for the company?

Yes, I'd love to know more about the company culture and how junior developers are supported in their career growth. Also, what technologies or projects would I be involved in?

11. What do you want to be doing in 5 years time?

In five years, I see myself as a skilled data engineer and data analyst, possibly leading a team and working on meaningful data-driven projects. I hope to contribute to innovative solutions using data and continue improving my technical and analytical skills.

12. Do you like to work as part of a team or work alone? Why?

I enjoy working in a team because it allows for collaboration and different perspectives. But I'm also capable of working independently when needed. I believe flexibility is important.

13. Will you work at home if it is needed?

Yes, I can work from home when required. I have experience managing my time

14. What challenges are you looking for in the future?

I'm looking for challenges that push me to improve — such as working on large-scale systems, learning new technologies, and solving real-world problems that have a meaningful impact.

15. Are you happy to work in Bangkok? Why or why not?

To be honest, I would prefer not to work in Bangkok. The traffic is very congested, and commuting often requires a lot of extra time just to get to and from work. The cost of living is also quite high, and the overall environment can feel overwhelming and stressful at times. I prefer a quieter and more balanced lifestyle where I can focus on work more efficiently.
