OBJECTIVE

Highly motivated and detail-oriented Computer Engineering student seeking a position as a Backend Developer. Passionate about building scalable backend systems, writing clean APIs, and working in collaborative tech environments. Eager to contribute technical skills and grow professionally in a dynamic development team.

EXPERIENCE

Backend Developer Intern

AxelTech Software Co., Ltd.

Bangkok, Thailand
June 2024 – August 2024

- Developed and documented RESTful APIs for the HR management platform using Go and Gin.
- Designed relational database schema and implemented data access layers with GORM and PostgreSQL.
- Collaborated in Agile sprints and CI/CD pipelines using GitHub Actions and Docker.

Software Engineering Exchange Trainee

CodeBridge GmbH

Berlin, Germany
January 2024 – March 2024

- Joined a multinational backend team to develop a microservice for transaction logs in a logistics platform.
- Worked with Go, Redis, RabbitMQ, and PostgreSQL under mentorship of senior engineers.
- Learned and applied best practices in API security, error handling, and system monitoring.
- Presented weekly progress updates in English to cross-functional teams.

Junior Backend Developer (Part-time)

InnoEdge Tech Lab

Kaen, Thailand
July 2023 – December 2023

- Implemented backend services for a university e-learning project using Node.js and Express.
- Integrated MongoDB for data storage and JWT for authentication.
- Created API documentation with Swagger and tested endpoints using Postman.
- Participated in code reviews and learned teamwork in a SCRUM-based workflow.

EDUCATION

Suranaree University of Technology

Bachelor of Engineering in Computer Engineering

Nakhon Ratchasima, Thailand
2022 – Present

- GPA: 4.00

SKILLS & INTERESTS

Technical Skills:

- Languages: Go, JavaScript (Node.js), SQL, Python
- Frameworks: Gin, Express.js
- Database: PostgreSQL, MySQL, MongoDB
- Tools: Git, GitHub, Postman, Docker, VS Code
- Testing: Unit Test (Go), Jest (Node.js)

Interests:

- Backend architecture, microservices, clean code
- Open-source contribution, DevOps fundamentals
- Reading tech blogs, listening to tech podcasts
